

**Many publishers have not kept up with the fallout from inappropriate school policies, practices, and failed reforms such as:**

- whole language (purist version)**
- whole math programs**
- D.A.P.-Lite (daycare version of developmentally appropriate practices)**
- automatic social promotion**
- full inclusion “at all costs”**
- denial of special education services to children before seven years of age**
- “muzzling” teachers so they won’t tell parents their child needs health services**
- large class size**
