

## Textbooks Look-Backs

**Students should be taught to skim over the text and:**

- **Try to recall when specific information was covered. Was it in the beginning, middle, or end of the chapter?**
- **Read the headings and the subtitles to locate the right section of the text.**
- **Read the topic sentence to identify the specific paragraph where the information might be found.**
- **Read the caption under timelines, maps, tables, illustrations, charts diagrams, and graphs.**
- **Read important vocabulary words in italics, set in bold text, and/or highlighted in a different color.**
- **Read any call-out quotes.**
